

ADDITIONAL QUESTIONS

1. Why do you think you are a goodfit for this internship?

Ans. I believe I am a strong fit for this internship because of my technical foundation in data analysis, my ability to learn quickly, and my enthusiasm for contributing to meaningful projects. My hands-on experience with tools like SQL, Python, Power BI and Excel has prepared me to handle the responsibilities of this role effectively. Additionally, my proactive attitude and ability to collaborate in a team make me confident about delivering value to your organization.

2. What specific skills or experiences make you confident about excelling in this role?

Ans. I have 11 months of experience as a Data Engineer, where I worked on building data pipelines, cleaning and transforming data, and creating interactive dashboards. I am proficient in tools like SQL, Python, Power BI, Excel, Snowflake and Dbt Cloud, which are critical for analyzing and visualizing data. Additionally, my projects, such as the Food & Beverages Sales Dashboard and Electric Vehicle Adoption Analysis Dashboard, demonstrate my ability to draw actionable insights from data. These skills, coupled with my problem-solving mindset, make me confident about excelling in this role.

3. Are you currently based in Ahmedabad? If not, are you willing to relocate for this in-office internship?

Ans. Yes, I am currently based in Ahmedabad and would be available to join the in-office internship without any relocation concerns.
